Introduction

ADA Abaya It is a project launched by a talented young woman at the end of 2024 and has become a distinctive name in the world of fashion, as it offers an ideal blend of authenticity and modernity and serves all segments of society. The brand is famous for its elegant and sophisticated designs that distinguish women seeking distinction and sophistication, while committing to quality. Brand ADA Abaya continues to chart new trends to make each piece reflect beauty and sophistication.

Project Goals

- **Facilitate the shopping experience:**

Providing a seamless shopping experience that includes product browsing, size options, and online payment.

- **Expanding into new markets:**

Enabling customers from different regions to buy abayas from anywhere in the world.

- **Display designs professionally:**

Providing a platform to showcase the latest designs in high quality with important details for the customer for each piece.

- **Offer customization features:**

Providing a feature to customize products, for girls who want to change or, modify or add anything to the abaya.

- **Facilitate the payment experience:**

Simplify the payment process to be quick and easy and provide payment options to facilitate the purchase process.

Business Process

1. The user opens the website in a browser.
2. If the user is new, they must register for an account, if the user has already an account they log in.
3. The user lands on the homepage, where they can browse collections, featured products, and promotions.
4. The user selects a category (e.g., summer and winter abayas)
5. When the user chooses the abaya from a specific category, he will choose the size, color and can add comments for customization.
6. The user adds the selected abaya to the shopping cart.
7. The user can edit items in the cart before proceeding.
8. The user writes his location.
9. The user chooses the appropriate payment method.
10. Placing the order, and after receiving the product the user can rate the abaya.
11. The user logs out if they are done using the website.

Business Scope

Its location is in Riyadh, and it provides its services locally. If there is a possibility of delivery, it delivers globally and it is specialized in designing elegant and luxurious abayas, they target women of all ages.

The system shall support the addition of new product collections, including seasonal, without affecting platform performance.

The system shall support adding new users without affecting platform performance.

-Bilingual (English/Arabic):

The system shall support both English and Arabic languages for all user interfaces.

Interview Questions and Answers

Q: Can you tell us about the start of your business? What do you offer? Who is your target audience? Where are your headquarters

A: ADA ABAYA is a small personal project that I started late last year 2024 because of my love for design and abayas, so I decided to start a project that combines them, providing women with excellent abayas in all aspects and my current location Riyadh

Q: What are the competitive advantages that set you apart from other brands

A: We provide abayas with distinctive designs and high quality, in different cuts and colors to suit all tastes, and at the best prices

Q: Are there any specific things you want your website to do in terms of performance, safety, or how easy it is to use

A: Performance requires displaying search queries within two seconds for smooth experience. Security is critical. All data needs to be encrypted. The website has to be portable, functioning on mobile, tablet, and desktop computers with little effort. It should be available to all databases 24/7 with little downtime. Scalability is necessary for adding products and users without diminishing performance. Lastly, it has to be bilingual for better reach (English/Arabic)

Q: What features and functions do you need on your website for your business

A: The website should give the ability for user registration and allow them to log in or log out. Users can view products, select collections, size, color, and manage their shopping cart. Smooth placing of orders with various payment gateways, such as credit cards, Apple Pay, and Mada, is a must. It should also enable customers to rate the products. In addition, admin management should be enabled to add/manage products, view orders, view customer details, and monitor the ratings by the user

Q: Do you have a specific logo you want to use on the website, or do you want a new design

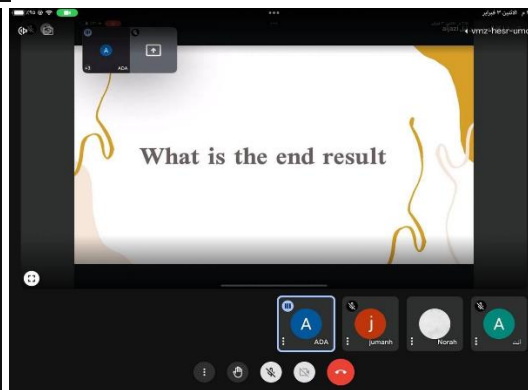

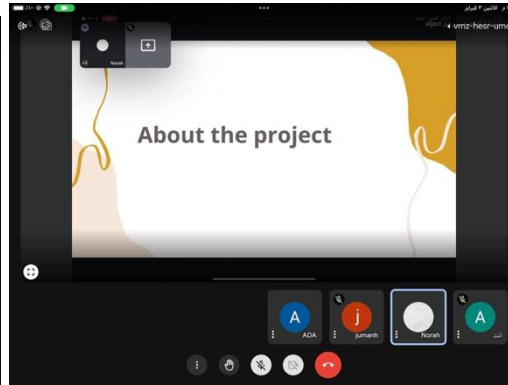

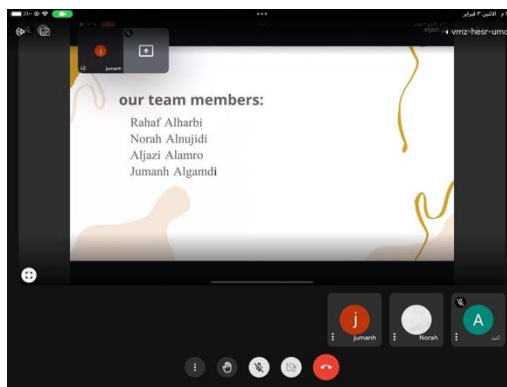

A: Yes, I have a logo in gold and black, and I want to use it on the website

Q: Do you have high-quality product images available, or would you like assistance with photography or image editing

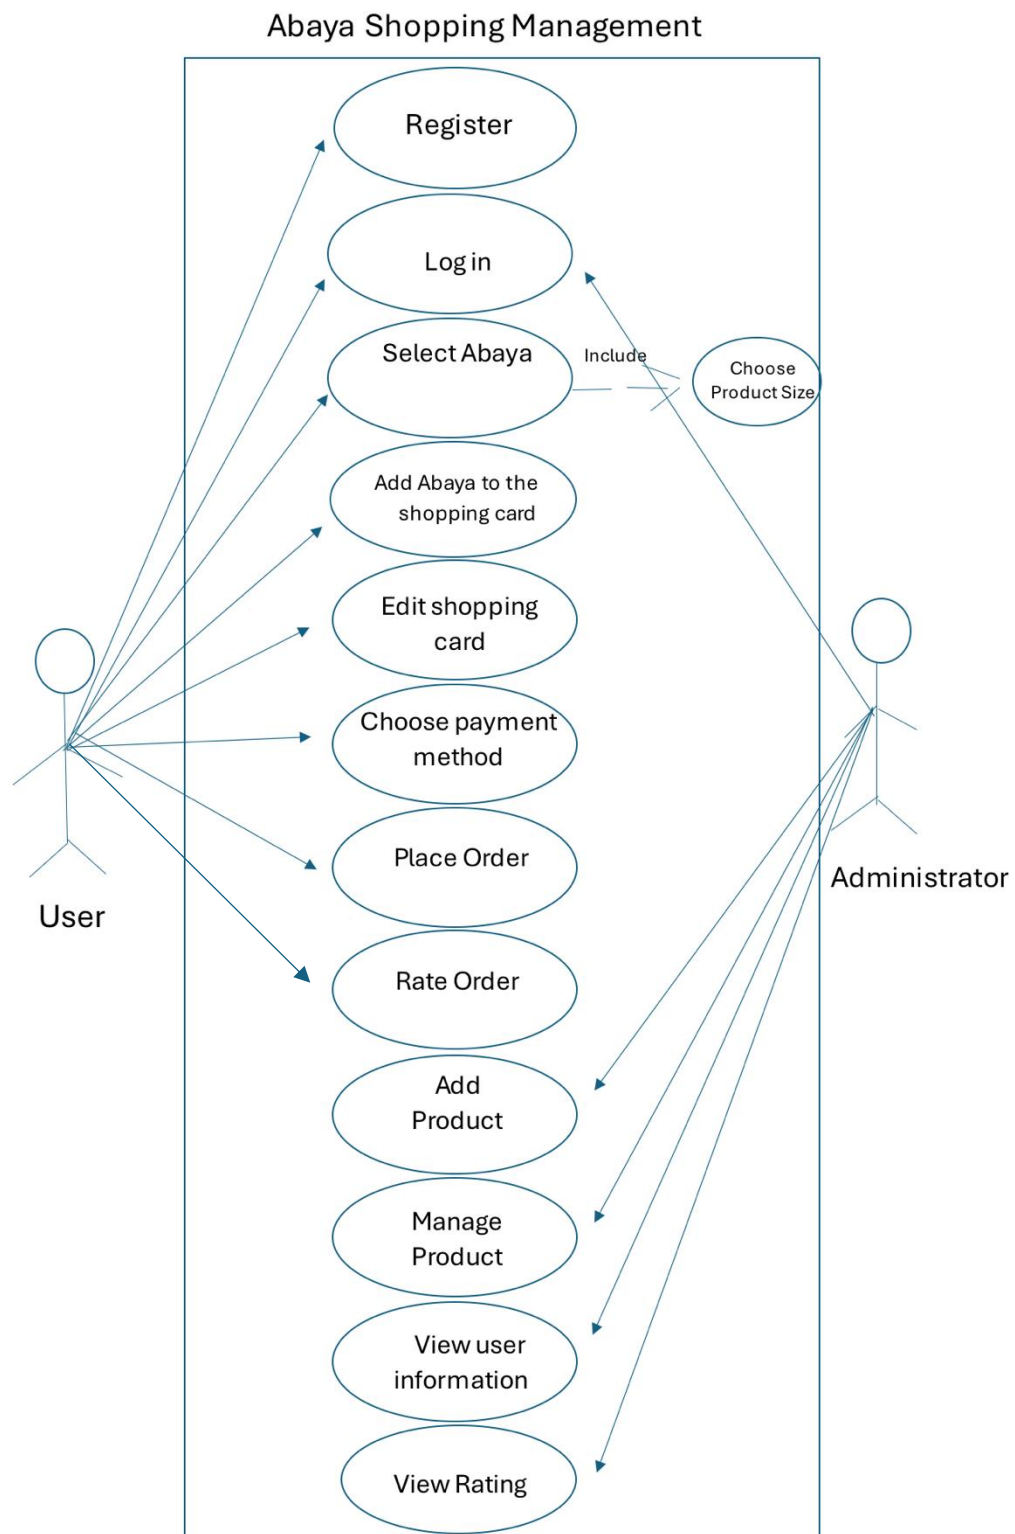

A: Yes, I have a high-quality photo from different angles to show the design and fabric details perfectly

Q: What payment methods will be available

A: I want to provide my customers with all online payment methods except installment methods such as Tabby and Tamara

Use case diagram:

Use case specification:

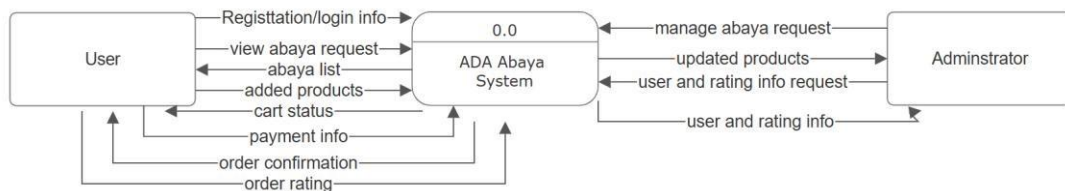

Name	Login
Actor	User/Administrator
Description	User and administrator login to the Website using username and password
Successful completion	1- Website displays a login page 2- User enters correct username and password 3- User Clicks login button 4- User gains access to the Website 5- Website displays homepage based on user type (user/administrator)
